Demulcent

Forms a soothing film over the mucous membrane of the Buccal cavity and ensures free flow of speed-up with no-irritation of the esophagus.

Ionic Calcium

- Ionic calcium gets rapidly absorbed in the body
- Restores normal calcium levels in the body
- Maintains Calcium levels for longer time

Magnesium

- Helps in mobilization of Calcium in the animals
- Plays role in the protection of heart tissues against high I/V calcium dose

Selenium

- Optimizes the overall health in calcium deficient animals
- Helps in mobilization of Calcium in the animals

Natural Source of Energy

- Helps to provide energy for speedy recovery
- Optimizes the milk production & thereby high yield
- Improves post calving health & production
